

SGG PICTO®

*The anti-glare  
picture frame  
glass*

# SGG PICTO®

*The micro-textured anti-glare glass for framing applications.*

## Description

SGG PICTO is a 2.1 mm glass with two micro-textured sides that contribute to its anti-glare properties sought after in framing applications.

It is produced following the same process as for patterned glass.

## Applications

SGG PICTO is a glass dedicated to framing applications, ideal for:

- Hanging Frames
- Standing Frames
- Clip Frames

Its anti-glare properties emphasise the intensity of colours and ensures perfect sharpness of the photograph. To optimize the product's functionalities, the glass must be placed in direct contact with the picture.

## Advantages

- SGG PICTO is an anti-glare glass which eliminates reflection and allows clear vision from every point of view.
- Thanks to its optical properties, SGG PICTO totally respects the picture.
- Highlights the contrast between colours without distorting outlines.
- Guarantees the clarity sought after in this application.
- Easy to clean.
- No ageing.

## Range

### Thickness:

2.1 mm (+/- 0,1 mm)

### Standard dimensions:

- 1200x1600 mm
- 1200x1800 mm

For other dimensions, please contact us.

## Performances

<b>Thickness</b>	2.1 mm
<b>Weight</b>	5,25 kg/m <sup>2</sup>
<b>Gloss<sup>(1)</sup></b>	55 ± 10
<b>Haze<sup>(2)</sup></b>	≤ 16
<b>Clarity<sup>(3)</sup></b>	≥ 40

<sup>(1)</sup> The lower the « gloss » value, the better the anti-glare properties of the glass. The average gloss value for a float glass is around 170.

<sup>(2)</sup> The lower the « haze » value, the better the contrast and definition of colours and outlines.

<sup>(3)</sup> The higher the « clarity » value, the better the image resolution.

In order to optimize SGG PICTO's performances, it is advisable to place the side labeled "Ext" at the exterior of the frame.

## Processing

SGG PICTO can be cut like patterned glass. Thanks to its particular dimensions, SGG PICTO is easy to handle.

## Installation

SGG PICTO must be installed in accordance with current national safety standards and regulations. Recommendations to stock and handle this product are identical to patterned glass.
