

COOL- LITE K series

Solar control glass

DESCRIPTION

Selective solar control and low- E coating for better energy savings.

This solution protects interior spaces from heating up while maximizing daylight. Thereby sustainably reducing the cooling, heating and lighting effort required ; the result is a bright atmosphere and comfortable room temperature – in any season.

PERFORMANCE

Standard thicknesses : 6-8-10 mm (other on request) - Dimensions : Jumbos, split sizes

Average performance values of DGU (6+12+6 mm) with coating on surface #2, according to the standards ISO 9050 m1 / EN 6731 and to the standards NFRC 100

PROCESSING CAPABILITIES

Available in two versions : temperable or to be tempered

To be assembled in double glazing only

Edge deletion mandatory

ADVANTAGE

Solar control

Temperature control LOW- E

Daylight comfort (from 30% to 60% transparency)

Energy savings

Colored, reflective or neutral aesthetics

COOL- LITE K series
