

STADIP COLOR

Design - Safety and colour

DESCRIPTION

STADIP COLOR is coloured laminated safety glass consisting of two or more glass layers which are assembled using one or more coloured Polyvinyl Butyral (PVB) films.

RANGE

An extensive palette of transparent and translucent shades:

Films of different colours can be combined up to a maximum of 4. This gives you the possibility of producing over 1,000 colours. For external applications it is necessary to add an additional PVB interlayer to ensure the colours are UV-stable.

Min. composition for external applications: 6.8mm;

min. composition for internal applications: 6.4mm;

max. composition: please contact the referred sales person to your area by clicking [here](#).

BASIC GLASSES

PLANICLEAR, clear glass;

DIAMANT, extra clear glass;

PARSOL, body tinted glass;

MASTERGLASS, patterned glass;

DECORGLASS, patterned glass.

DIMENSIONS

Min: 300 x 300 mm

Max: 1,590 x 4,500 mm*

(*) Other dimensions on request.

PROCESSING CAPABILITIES

STADIP COLOR is laminated in the same way as STADIP laminated safety glass. The COLOR films can be combined with STADIP SECURIT, a toughened laminated glass. Installation must always take place in accordance with the regulations in force.

PRODUCT APPLICATION

STADIP COLOR is used in homes, offices, shops, restaurants, hotels, trade fair stands, etc.

External application:

façades (within a double glazed unit),

roofing,

balustrades,

skylights.

Internal application:

partitions,

doors,

atriums,

ceilings,

balustrades,

stairs,

flooring,

furnishings.

ADVANTAGE

Exclusive colours can be created for any project. STADIP COLOR is designed for applications where coloured glass combined with the performance of laminated glass is required. STADIP COLOR reduces the transmission of ultraviolet radiation. It can also improve the solar insulation performance of double glazing.
