

PICTUREit

Design - Design your glass

DESCRIPTION

PICTUREit is a versatile and reliable support for the expression of one's sense of aesthetics and for the communication visual messages.

RANGE

Picture- It is glass with a printing on one side. The printing process uses high- temperature fired enamel. Using this technique, it is possible to print permanent designs, photographs and text onto all types of glass. No limits to the creation of customised designs in colour. Traditional glazed products can now incorporate the high quality printing of logos, signs, images and designs. PICTUREit is always available in toughened glass and can be laminated with hard- coated glass in insulating glass unit. The value of g factor is calculated for each glass package design (please contact technical support).

Glass substrates	clear & extra- clear glass, pattern glass, coated glasses, satinated glass...
Designs and Images	Images, design, shapes, pattern, text from digital file source
