

## TITLE

SGG PLANILUX

## SUBTITLE

Float Glass - SGG PLANILUX

## BASIC INFORMATION

SGG PLANILUX is a multi-purpose clear glass. Available in a wide range of thicknesses, SGG PLANILUX is the base glass which can be processed into insulated glass, laminated glass, toughened glass, screen-printed glass, etched glass, sandblasted glass, edge-worked and lacquered coloured glass. This float glass has several applications - from furniture to all glass structural facades.

## DESCRIPTION

SGG PLANILUX is a high quality, clear annealed glass, manufactured by the float process.

## PRODUCT APPLICATION

Manufactured in a wide range of thicknesses (2mm - 19mm), SGG Planilux serves as the base glass for many processed and high performance glasses and is suitable for all architectural and furniture requirements and any other applications requiring neutral transparent glass.

## ADVANTAGE

This float glass fulfils all architectural needs - be it for glass roofing, glass windows, greenhouses, balconies or canopies. It can also be applied in interior décor for glass shelves, furniture and even glass doors.
