

TITLE

SGG Miralite Solar

SUBTITLE

Solar Thermal Glass Mirrors - SGG Miralite Solar

DESCRIPTION

Solar mirrors are flat and parabolic shaped mirrors for solar applications. SGG Miralite Solar can withstand extreme external conditions and has very high reflectivity, making it ideal as a mirror for thermosolar / CSP applications.

RANGE

Shapes: Flat, parabolic

Thickness: 3mm and 4mm

PRODUCT APPLICATION

Thermosolar / CSP applications, In applications such as linear Fresnel collectors, parabolic troughs, parabolic dishes and power towers. These mirrors are also suitable for industrial heating and steam generation applications.
