SUBTITLE

Pattern Glass with Precise Geometry-SGG Masterglass

BASIC INFORMATION

The SGG MASTERGLASS range consists of five tasteful interior glass patterns. These shiny geometric patterns are printed onto the glass, and appear transparent on a translucent matte base.

DESCRIPTION

A precisely controlled process produces the distinctive textures in the glass surface. The glass has one textured face and one smooth face.

All aspects of quality of SGG Master Glass textured glass conform to EN 572-5

PRODUCT APPLICATION

This contemporary range of design glasses brings style and brilliance to any application. It is ideal for creating sophisticated environments in residential, commercial and retail settings(offices, shops, hotels etc)

SGG MasterGlass is used extensively, in application like:

Fixed or sliding partitions
All- glass doors and framed doors
Windows and glazing in facades
Shower and bath screens
Furniture(cabinet doors, tables, counters, shelves)

Indoor and outdoor guarding
Balcony screens
Stair treads, floor panels
Street furniture
Balustrades

ADVANTAGE

The ^{SGG} MasterGlass range comprises five patterns, which offer a fresh approach to any glass application.

^{SGG} MasterGlass glass can be used to create attractive aesthetics effects. Its high degree of translucency optimises lightlevels, whilst providing subtle obscuration for privacy and screening.

For locations and applications requiring safety glass, ^{SGG} MasterGlass can be used in either toughened or laminated form, in order to comply with current national standards and regulations.

GUIDELINE

^{SGG} MasterGlass must be installed in accordance with current national safety standards and regulations.

As with all textured glasses, ^{SGG} MasterGlass has a pattern direction

For a uniform appearance, the cut sheets must be placed side by sidewith the pattern on the glass in the same direction

Special care must be taken when cutting glass where continuity of pattern is required
