SUBTITLE

Pattern Glass - SGG Baldosa Grabada

BASIC INFORMATION

SGG BALDOSA GRABADA is from the DECORGLASS series in 19 mm thickness. This pattern glass is essentially something that will impart great aesthetics to architectural interiors.

DESCRIPTION

SGG Baldosa Grabada is a thick patterned glass (19mm) with a unique deep pattern embossed on one face. This is obtained by casting and rolling the glass between two cylinders.

The pattern is deep and three-dimensional, ideal for use in interiors. SGG Baldosa Grabada is part of the extensive SGG Decor Glass range.

RANGE

PRODUCT APPLICATION

This patterned glass has multiple applications.
As privacy glass in bathroom shower screens
As interior design glass in halls and bedrooms
For kitchen counter tops
Wash basins, bathroom counters and room partitions
Shops
Hotels, offices and other public buildings
Floors: A glass floor enhances the look and feel of a room

ADVANTAGE

Light Transmission:

This patterned glass can be used in spaces where opaque material is normally used, thanks to its mechanical properties. It makes an interior look spacious by allowing light to flow into it.

Design: structure

The sheer simplicity of this pattern glass makes it popular for interior design.

Mechanical strength:

Because of its optimal thickness, this pattern glass is used.

GUIDELINE

The strength of the support structure must be taken into account when calculating the size of the panels.

Avoid installing glass directly in contact with a significant heat source

Positioning of the glass sheets:

Pattern facing upwards for reduced slippage

Pattern facing downwards for areas in which ease of cleaning is important

Ensure the Silicon used is compatible with the Glass
