

TITLE

SGG Diamant

SUBTITLE

Extra Clear Glass - Interior Design Glass - SGG Diamant

DESCRIPTION

SGG DIAMANT is an extra clear glass which is valued for its attractive appearance and optical qualities. The lower iron content produces a higher light transmittance and a reduced green tint inherent in other glasses.

RANGE

SGG DIAMANT can be combined with many glass products from the Saint-Gobain range including different safety glasses to provide protection against injury in the event of breakage. It enhances a look of your interior, Balustrades, shelves even furniture and tables.

Size: 3210*2250mm, 3210*2000mm*(as pwe availability)

PROCESSING CAPABILITIES

SGG DIAMANT can be:
cut, shaped, drilled, notched and edged
assembled into double-glazed units
laminated
toughened
enamelled

PRODUCT APPLICATION

SGG DIAMANT is designed for applications where its unique appearance and optical qualities are of particular advantage:
interior design and decoration
external cladding
shop windows and commercial frontages
bolted glass assemblies

ADVANTAGE

Excellent clarity of the glass ensures true colours are seen and optimum vision quality is achieved when looking through the glass

Clear Glass: Offers a high level of light transmittance

Glass allows maximum natural light to create pleasant interior rooms, Glass has high level of transparency to achieve the desired effect in interior

Glass is particularly beneficial for thicker laminated products, affording a high level of transparent
