

74%⁽¹⁾

of people owning a conservatory or hard-to-access windows are concerned about cleaning them.

SGG BIOCLEAN, FOR WINDOWS THAT STAY CLEANER, LONGER

There's nothing better than a conservatory to enjoy the sun all year round, large bay windows for apartments bathed in light, or a glass roof with an unspoiled view of the sky. Yet nothing's more complicated and tiring than cleaning them. With SGG BIOCLEAN, discover a technology that's going to simplify your life. SGG BIOCLEAN windows clean easier, faster and less often. More light, and less effort.

SGG BIOCLEAN

QUICK AND EASY, SCRUB-FREE CLEANING

Thanks to a special transparent coating embedded into its outer surface, the glass stays cleaner, longer. This coating uses **daylight's ultraviolet rays - which decompose organic pollutants - and then the rain, which flushes them away**, naturally. It also avoids streaks formed by water drops, making cleaning easier. SGG BIOCLEAN's efficiency remains constant over time, your SGG BIOCLEAN windows maintaining their properties **over their whole service life**.

"I very soon traded in my cleaning tools and opted for the water jet solution, which is the best cleaning option I would recommend"
Jean-Pierre

"With SGG BIOCLEAN, we've much less hassle cleaning, it's just a pleasure to enjoy our conservatory"
Sylvie

HOW DOES IT WORK?

SGG BIOCLEAN **acts 100% naturally** by exploiting the dual action of daylight and rainwater

The UV-activated **photo-catalysis** disintegrates dirt such as streaks of rain, dust and organic atmospheric pollutants, present on the surface of the glass.

Watch the demo video.

Thanks to the **hydrophilic** effect, previously disintegrated dirt is eliminated by rainwater (or a water-spray jet) which runs off the glass surface easily.

FOR YOU, SGG BIOCLEAN IS:

- Time-saving.
- Easier to clean, and less often.
- Ideal for hard-to-reach places.

CARE FOR THE ENVIRONMENT

- 100% natural action.
- 100% recyclable glazing.
- Glazing composed of 30% recycled materials.
- Lower use of water and detergents.

SGG BIOCLEAN

WHERE TO USE IT?

With SGG BIOCLEAN, keeping even your most exposed windows clean is no longer a problem. Thanks to SGG BIOCLEAN technology, your largest or hardest-to-reach windows **can be cleaned more easily, faster and less often**. You can enjoy more **generous light**, effortlessly, reducing even the cost of cleaning products, because a **simple water jet is enough**.

On pitched conservatory roofs (> 10°)

Natural cleaning

On bay windows

Cleaning 5x faster

On hard-to-reach glass panes and railings

Cleaning 3x less frequent
