

SGG PARSOL[®] ULTRA GREY

*Intensely
grey glass*

SGG PARSOL® ULTRA GREY

The most intense grey for stylish interiors

Description

SGG PARSOL® ULTRA GREY is a body-tinted float glass, manufactured in the same way as clear glass.

It gives an extremely intense colour and has a very low light transmittance level (10% for the 4 mm and 3% for the 6 mm).

Applications

SGG PARSOL® ULTRA GREY gives a deep grey colour which enhances all types of interior.

It is ideal for creating design spaces.

Its warm shade gives a feeling of sophistication, warmth and privacy.

It can be used for various applications, including in furniture (shelves, cupboard doors, tables, etc.), partitions, internal doors and shower screens.

Avantages

- The shine and depth of a very intense grey
- A very low light transmittance level, providing privacy
- Similar processing options to those for float glass

Range

Thickness:

4 and 6 mm (+/- 0.2 mm)

Regulations

SGG PARSOL® ULTRA GREY complies with standard EN 572 2.

This product carries the CE mark.

Processing

SGG PARSOL® ULTRA GREY can undergo the same processes as float glass.

Amongst other processes, it can be toughened.

Installation

The installation options and recommendations for SGG PARSOL®

ULTRA GREY coloured glass are identical to those for a body-tinted float glass.

For certain applications, the glass may require toughening or hardening to avoid the risk of breakage.

The glass must be sized and installed in accordance with current regulations and good practice.
